## **AMENDMENTS TO THE SPECIFICATION**

### **In the Abstract:**

Please replace the Abstract with the following Abstract:

The invention relates to a cell carrier (10) for receiving a biological sample. The Said carrier comprises a magnetic element (20) and a floor element (30) that forms a stable support (31) that can be displaced on a solid base surface in at least one direction. The invention also relates to a manipulation device for biological samples and to a method for manipulating biological samples.
